

Access a wider market with EFTs that verify instantly

Instant EFT by Peach Payments is a secure, convenient way to receive payments via online stores or payment links

South African data from www.statista.com (2021)

Keep it flowing

Instant EFT by Peach Payments keeps customers on your site

- Customers make secure payments on site without switching to internet banking
- Payment flows without your customer picking up a bank card
- Streamlined checkout increases customer conversion rate

Make payments work for you

Instant EFT by Peach Payments is simple and convenient

- Payments are made directly to your account
- None of the transaction limitations of manual EFTs
- Payment verification means no fraudulent transaction charge-backs
- Reduce admin with automated payment-to-transaction allocations

Easy Accounting

Reduce payment reconciliation time linking payments with products

- Less admin with automated payment-to-transaction allocations
- Transactions are settled daily for ISO and weekly for aggregation

Extend your reach

Access a wider market with an extra payment option available to anyone with a bank account

- Accessible to those who can't pay with card
- Transact in industries that don't allow card payments
- Send payment links without the need for an online store

Sales that move

With instant payment verification, you can fulfill sales without delay

- Start preparing delivery or initiate services from the moment a transaction is made
- Stock doesn't have to sit whilst waiting for a manual EFT to clear
- Faster fulfillment means faster service and happier customers
