MauCAS QR: Scan.Pay.Done

**MauCAS QR enables customers to scan a QR code at checkout in an online store using their smartphone and any digital payment wallet in Mauritius.**

How it works

- Customers select MauCAS QR as their payment method at checkout.
- They scan the mauCAS QR with their banking app
- Once the QR is scanned, they have to authenticate the transaction within their app

Why MauCAS QR?

- Faster Checkout – No need to manually enter payment details. Customers simply scan, confirm, and pay.
- Error-Free Transactions – Since the amount and merchant details are pre-filled, there's no risk of manual entry errors.
- Enhanced Security – Each QR code is generated for a specific transaction, reducing the risk of fraud or duplicate payments.

Market trends show that while 80% of payments are still made by card, QR payments are rapidly gaining traction. With strong government and merchant backing, QR payments are becoming a preferred option due to lower transaction costs compared to cards.

Payment Method	SME Package	Enterprise Package
MauCAS QR	Volume-Based	Volume-Based

Who is this for?
Enterprises & SME's in Mauritius
