

# Scan to Pay - QR Code Checkout

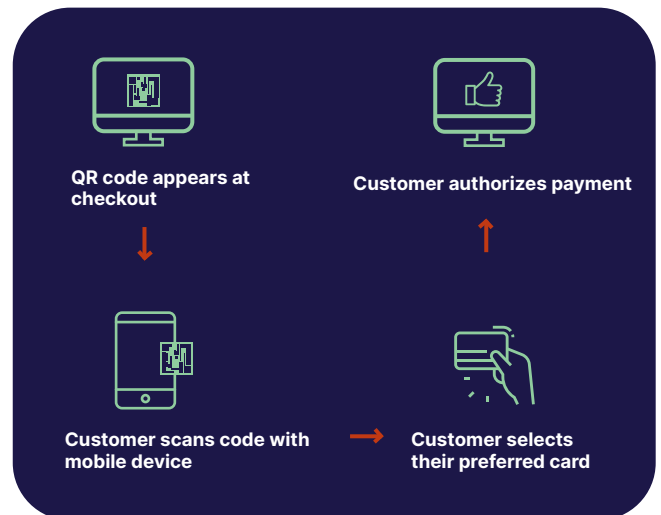

Quick and secure payments through your banking app

QR codes are easy to use - just scan me with your camera :)

Making and receiving payments is free for the bank's customers, and all transactions are tracked so users know where their money is going. Each user gets a unique QR code, which can be scanned as a digital image. Or, if you're feeling old-fashioned, the bank also offers the option of a laminated card on a lanyard.
